2. Based on the Appendix A map of disturbed areas at the end of 1989, the disturbed area was 365.72 acres. During 1989, 78.38 acres were hydroseeded. Adding both numbers together generates the 444.1 acres in your letter dated 12/16/92. This would have been the maximum disturbed acreage during the year and the disturbance at the time of transfer had we not hydroseeded 78.38 acres thereby reducing the disturbance to 365.72 acres.

Upon further scrutiny of the two tables on the Appendix A map, it became apparent that 37.54 acres of the 49.59 acres of Melco Haul road disturbance were hydroseeded in 1989. Therefore, the disturbance at the end of 1989 should have been (365.72-37.45) 328.27 acres.
